About NITECORE

Here at NITECORE it's all about passion and dreams. We share the same experiences that you do on adventure, road and forest and these experiences push us to make the best gear possible for worldwide users. Established since 2004, SYSMAX, which began with a DIY flashlight has grown into an innovative professional company with a myriad of products.

SYSMAX created "NITECORE"— a new subbrand in 2007, which is dedicated itself to starting business in general-purposed illumination tools market. NITECORE does not just stand for outdoor enthusiasts, but one that stands for the spirit of the sports we live, their values and goals, past, present and future. NITECORE's patented design has become a label to provide fast and stable illumination experience to all walks of life.

As a member of PLATO (Portable Lights American Trade Organization), NITECORE has established a wide range of distribution network around the world. We today are more committed than ever to creating more favorable products and pushing the development of outdoor illumination tools industry. Thanks to the many people whose limitless energy and hands-on involvement we are creating a promising future for all flashlight fans and professional users.

2013 NEW MILESTONE

P25

TM26

2004

2004 LR7 - One of the first high-intensity LED flashlights made in China.

2005

2005 Luxeon - The first branded Chinese 3W LED flashlight.

2006

2006 One of the first ever flashlights to adopt a HA-III finish.

2007

2007 MK2 - The first ever AA-based flashlight to feature an integrated MCU.

2008

2008 NDI - The world's first AA-based flashlight features Infinite Variable Brightness.

2009

2009 D10 - The world's first flashlight features Smart PD (Piston Drive) System.

2010

2010 IFE1 - The first ever flashlight features Magnetic Sensor IBS System.

2011

2011 TM11 - The world's smallest and lightest 2000 lumen flashlight.

2012

2012 EA4 - 4xAA Compact Searchlight

What is an LED?

LED is an acronym for Light Emitting Diode – a special type of semiconductor that was initially used to replace standard lamps in early electronic equipment, later progressing to consumer electronics in the form of VCR and calculator displays. In the past decade, massive advances have been made in LED technology, with today's high-power white tint LED's commonly used in automotive/bicycle lighting, aviation, laptops and televisions, and even home lighting. LED technology is fast replacing older incandescent technologies (such as halogen and tungsten) due to its superior efficiency, durability and longevity, making it the ideal solution for the 21st century.

The LED advantage...

Energy savings

LED's convert approximately 20% of their input power into light energy, compared to conventional incandescent bulbs which generally only convert about 2% of their input power into light. As a result, LED technology offers excellent energy savings over competing alternatives, making it a cost effective and environmentally-friendly solution for modern light-emitting devices.

Longevity

The principle behind conventional incandescent technology is based on electrons travelling through a tungsten filament, causing the filament to generate temperatures of up to 2500 Celsius, with light energy merely a byproduct of this process. Due to this inherently inefficient design, incandescent bulbs rapidly deteriorate and burn out after about 1000 hours of use. LED's, on the other hand, operate on an entirely different principle, and while they do require specialized components to achieve maximum brightness, a working lifespan up to 50,000 hours is possible, with a gradual fading of brightness rather than instant burn-out.

Durability

Due to the absence of a delicate filament and thin glass bulb, LEDs can withstand shock and vibration far beyond that tolerated by incandescent lamps making them ideal for rugged and demanding applications.

We use the best LED

Quick Activation

An incandescent bulb generally takes about 100-300 milliseconds to illuminate once activated, while an LED needs only a few nanoseconds, giving it a significant advantage in highly demanding applications.

1% light
99% heat

80% heat

LED

NITECORE's Proprietary LED Technology...

NITECORE's highly efficient, ultra reliable proprietary LED drive circuit plays a crucial role in efficiently transferring battery power to the LED. As a result, all NITECORE products have exceptional output and long runtimes in comparison to competing products. While the majority of LED-based flashlight/personal lighting products on the market today suffer from continuously declining output, NITECORE products are able to maintain constant high output until battery exhaustion.

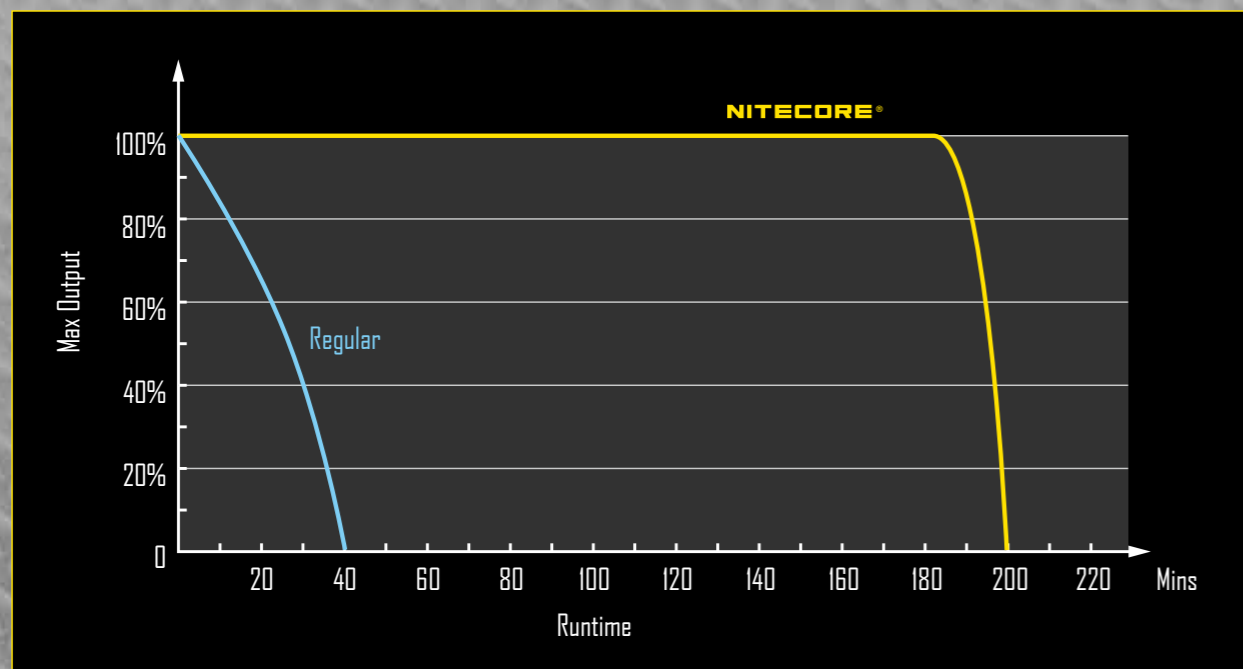

Distinction

Advanced Circuitry

NITECORE's proprietary regulation circuit is an essential component in every NITECORE flashlight. The circuit's unique power source management system delivers constant current to the LED regardless of battery condition/chemistry, resulting in continuous, unwavering light output for end users. The circuit's efficiency and reliability is further enhanced by carefully engineered electronic components such as gold or silver plated contact points. Moreover, every NITECORE flashlight features an

integrated microcontroller unit which works in tandem with the regulation circuit to offer an intuitive and versatile user-interface.

A Led drive/regulation circuit is crucial in improving the efficiency of the 'power to light' conversion process, allowing for longer runtimes and more stable operation using various battery chemistries. NITECORE's highly reliable and compact drive circuit is the reason NITECORE flashlights run longer and shine brighter than the competition.

Lens and Reflectors

With many years of experience in flashlight optical design, NITECORE's custom-engineered high-efficiency alloy reflectors ensure every flashlight emits a balanced beam profile of both flood and throw with minimal loss of light. All NITECORE reflectors are protected by AR-coated, anti-scratch mineral glass lenses.

Billet Aluminium Body

Every NITECORE flashlight is constructed from light weight, high strength aero-grade aluminium alloy. Additionally, the majority of NITECORE models are CNC machined from a solid aluminium bar. This manufacturing process gives NITECORE flashlights their superior shock/impact resistance, with many lights able to withstand being rolled over by car or dropped from several meters onto a hard surface with no performance loss (not recommended as may void warranty). Compared to cheaper and weaker tubular aluminium flashlights produced by the majority of flashlight manufacturers today, NITECORE offers significant gains in both ruggedness and performance. Furthermore, all NITECORE models are treated with a military-spec type III hard anodized finish, making the flashlight surface as tough as diamond, thus protecting it from scratches, abrasions and corrosion.

Tiny Monstar Series

TM26

3500 Lumens

4×18650 Batteries
8×CR123 Batteries

4×Cree XM-L U2 LED

Rechargeable

NEW

The series of the world's smallest, lightest, brightness flashlight

Dimensions

Head Diameter	68mm

Precise Series

NEW

P25 **860 Lumens**
SMILODON
 1×18650 Battery
 2×CR123 Batteries
 Cree XM-L U2 LED
 Rechargeable

Dimensions

Head Diameter	40mm
Tube Diameter	25.4mm
Total Length	160mm
Weight	171g

The Nitecore P25 is a truly innovative, purpose-designed flashlight featuring two integrated Picatinny connectors, making it incredibly easy to install on a firearm or use as an intermediary device for mounting a huge variety of compatible accessories. A patented single button, two-stage interface provides easy access to all modes and brightness levels, including a blazingly bright turbo mode of 860 lumens (ANSI FL1) with an exceptionally long run time of up to 325 hours. With unique gun-mounting functionality and a highly versatile feature set, the Nitecore P25 is the ultimate lighting tool for professional hunters and tactical users.

Output & Runtime

FLI STANDARD	TURBO	HIGH	MID	LOW	LOWER
	860 lumens	550 lumens	180 lumens	50 lumens	2 lumens
	1h45min	2h	7h	30h	325h
	1h15min	1h30min	5h15min	21h	200h
	283m (Beam Distance)				
	20000cd (Peak Beam Intensity)				
	1.5m (Impact Resistant)				
	IPX-8, 2m (Waterproof And Submersible)				

Explorer Series

The Nitecore design team's mission statement when developing the Explorer line of flashlights: "A ultra-compact line of flashlights that combine a highly tactile user interface with an attractive appearance and unprecedented performance." Explorer flashlights employ a novel but highly functional switch offering the most elegant and simple-to-use interface. From a thumb-sized EC1 to the eight AA batteries Searchlight EA8, from hiking, camping, to searching or caving, the Nitecore Explorer line will be your first choice for all walks of outdoor adventures.

EA4 **860 Lumens**
 4×AA Batteries
 Cree XM-L U2 LED
PIONEER

NEW

Dimensions

Head Diameter	40mm
Tube Diameter	41.2mm
Total Length	117mm
Weight	159g

Output & Runtime

FLI STANDARD	TURBO	HIGH	MID	LOW	LOWER
	860 lumens	550 lumens	300 lumens	135 lumens	65 lumens
	1h45min	2h	4h30min	11h	22h
	283m (Beam Distance)				
	20000cd (Peak Beam Intensity)				
	1.5m (Impact Resistant)				
	IPX-8, 2m (Waterproof And Submersible)				

UIT The Explorer series incorporates novel 'Unique Integrated Technology' (UIT) meaning the entire flashlight body is constructed from a single piece of aero-grade aluminum alloy. UIT ensures the Explorer series is sturdy and durable yet incredibly lightweight.

The below models are all incorporate novel "Unique Integrated Technology":

	1.5m (Impact Resistant)				
	IPX-8, 2m (Waterproof And Submersible)				

Largest reflector (1 inch) in its class reflects more light, translating to a longer throw distance

Three features of the red LED light

1. Red light has only a minimal effect on the night vision of the human eye making the Nitecore EA1 ideal for close-up night work without adverse effects.
2. Acts as a standby light and locator, making it easier to find in the dark.
3. Acts as a power indicator light which displays battery voltage and remaining power

Radiator fins integrated into the head design provide better cooling for exceptional overall performance

ON/OFF dual switch
Power / MODE button

EA1 **180** Lumens
1×AA Battery
Cree XP-G R5 LED

Dimensions

Head Diameter	25.4mm
Tube Diameter	19mm
Total Length	81mm
Weight	47.5g

Output & Runtime

Multitask Hybrid Series

Nitecore Multi-task Hybrid (MH) dual-fuel rechargeable flashlights are a new line of highly versatile and practical illumination tools designed for a multitude of users and environments. Featuring a high-precision long-range reflector, four brightness settings plus Strobe and SOS modes, the Nitecore MH series is the ultimate lighting tool for hunting, trekking, camping, law enforcement, searching and rescue.

Dual-fuel ultra-high intensity searching flashlight

Multi-Task series

MT flashlights are a new line of highly versatile and practical illumination tools designed for a multitude of users and environments. The output ranges from MT1A 140 lumens up to MT4D 860 lumens, a sleek, robust body finely etched with extensive knurling and a perfect finish are hallmarks of this range, but even more important is the highly practical and usable user-interface which makes selecting modes a breeze. NITECORE MT series flashlights essential have two modes: high mode (100% output) and custom mode. With the incredible feature set, the Nitecore MT series flashlight is your ultimate lighting tool for various environments.

A light designed for searching and law enforcement.

SENS Series

The world's smartest ever flashlight SENS series.

SENS series flashlight integrated with the Active Dimming Technology offering 5-8 times the runtime of competing products.

An acceleration sensor is built in the SENS series flashlight, which can continuously detect the angle of the light and work with the light's micro-processor to select the appropriate output. For example, when it detects a parallel position, the built-in micro-processor will assume a higher output is appropriate and increase output to illuminate a longer distance. When it detects a vertical position, micro-computer will decrease output so to save battery life, extending runtime of SENS up to 5-8 times.

About ADT(Active Dimming Technology):

Nitecore SENS series flashlights feature an integrated acceleration sensor and micro processor which work together to calculate the distance of targets based on geometric theory. The sensor continuously detects the angle of the flashlight in relation to the floor, while the micro processor uses this data to vary the light output.

Real-world example: Turning a SENS series flashlight on with the head pointed straight up activates active dimming mode. When held in a horizontal position, output will seamlessly and automatically increase for illuminating targets at a distance. Alternatively, when held vertically output will seamlessly and automatically reduce for closer range targets. When used in ADT mode, SENS series flashlights enjoy significantly longer runtimes than competing products.

Active Dimming mode is accessed by turning the light on with head pointing upward

Direct access to high fixed output mode.

Direct access to medium fixed output mode.

Direct access to low fixed output mode.

SENS AA 120 Lumens
1×AA Battery
Cree XP-G R5 LED

Dimensions

Head Diameter	19.8mm
Tube Diameter	17.5mm
Total Length	81mm
Weight	26g

Output & Runtime

FLI STANDARD	HIGH	MID	LOW
	120 lumens	20 lumens	6 lumens
	2h	12h	60h
	53m (Beam Distance)		
	700cd (Peak Beam Intensity)		
	1.5m (Impact Resistant)		
	IPX-8, 2m (Waterproof And Submersible)		

SENS CR 190 Lumens
1×CR123 Battery
Cree XP-G R5 LED

Dimensions

Head Diameter	19.8mm
Tube Diameter	19.8mm
Total Length	64mm
Weight	23.8g

Output & Runtime

FLI STANDARD	HIGH	MID	LOW
	190 lumens	60 lumens	20 lumens
	2h	6h30min	60h
	76m (Beam Distance)		
	1450cd (Peak Beam Intensity)		
	1.5m (Impact Resistant)		
	IPX-8, 2m (Waterproof And Submersible)		

SENS Mini 170 Lumens
1×CR2 Battery
Cree XP-G R5 LED

Dimensions

Head Diameter	19.8mm
Tube Diameter	18.5mm
Total Length	57mm
Weight	19.4g

Output & Runtime

FLI STANDARD	HIGH	MID	LOW
	170 lumens	50 lumens	20 lumens
	1h	4h	14h
	69m (Beam Distance)		
	1200cd (Peak Beam Intensity)		
	1.5m (Impact Resistant)		
	IPX-8, 2m (Waterproof And Submersible)		

SENS AA2 170 Lumens
2×AA Batteries
Cree XP-G R5 LED

Dimensions

Head Diameter	19.8mm
Tube Diameter	18.5mm
Total Length	146.5mm
Weight	46g

Output & Runtime

FLI STANDARD	HIGH	MID	LOW
	170 lumens	50 lumens	20 lumens
	3h	11h30min	37h
	69m (Beam Distance)		
	1200cd (Peak Beam Intensity)		
	1.5m (Impact Resistant)		
	IPX-8, 2m (Waterproof And Submersible)		

T series

T0 **12** Lumens
1×AAA Battery
Nichia LED

Features

- Maximum output of 12 lumens
- Maximum runtime of 21 hours
- Intuitive User Interface
- Ultra compact body for convenient one-handed operation
- Titanium alloy bezel for extra durability
- Customized diamond-shaped anti-roll rugged design for a comfortable handgrip
- Various colors available

Specifications

LED: Nichia LED

Body material: Aero grade aluminum alloy

Head material: TC4 titanium alloy

Finish: HA III Military grade hard anodized

Battery: One AAA battery

Waterproof: IPX-8 standard waterproof (2 meters)

Dimensions

Diameter	14.5mm
Length	73mm
Weight	17g

T2s **50** Lumens
1×AAA Battery
CREE XP-E (R2) LED

Features

- CREE XP-E (R2) LED
- Compact and portable
- High efficiency digital driver circuit
- Constant current (not PWM)
- Three levels of brightness plus warning signal
- Convenient one-handed operation
- Reverse polarity protection
- Removable stainless steel clip included
- This product has attained European CE and RoHS Certification

Dimensions

Diameter	12.5mm
Length	73mm
Weight	11g

Output & Runtime

FLI STANDARD	HIGH	MID	LOW
	50 lumens	20 lumens	2 lumens
	1h30min	3h30min	28h
	28m (Beam Distance)		
	200cd (Peak Beam Intensity)		
	1.5m (Impact Resistant)		
	IPX-8, 2m (Waterproof And Submersible)		

T5s **65** Lumens
1×AAA Battery
CREE XP-G (R5) LED

Features

- CREE XP-G (R5) LED
- High-grade 304 stainless steel construction

Dimensions

Diameter	12.5mm
Length	73mm
Weight	19g

Output & Runtime

FLI STANDARD	HIGH	MID	LOW
	65 lumens	25 lumens	2.5 lumens
	1h30min	3h30min	28h
	24m (Beam Distance)		
	150cd (Peak Beam Intensity)		
	1.5m (Impact Resistant)		
	IPX-8, 2m (Waterproof And Submersible)
